ABOUT THE CONFERENCE

The conference focuses on dissemination of findings in scientific area relating to living things. Human kind has been facing problems in all walks of life viz. birth, growth, maturation, ageing, environmental conditions, etc. All these problems are being addressed by scientists in the field of Microbiology, Biochemistry, Plant Biotechnology, Animal Biotechnology and Bioinformatics. The conference has been contrived to address the recent developments in the fields of Biosciences and Bioinformatics. This is aimed at assembling the experts of multifarious division to share their findings among the coterie of scientists. The contention of scientists on their investigations in this conference would result in fruitful outcomes and ensure motivation for young scientists. This concourse of scientific dissemination would pave way for more solutions to the existing problems and open new doors for research. This entourage is arranged to update and motivate the young minds to join the consortium of scientists. The topics to be addressed in this conference include the following:
